DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Weiser (US 4,860,329).
3. Regarding Claim 13, Weiser teaches a micro-miniature x-ray apparatus for steering focused x-rays in a selected direction (Figure 6), said apparatus comprising a radiation source (62) for generating both Bremsstrahlung photons and characteristic x-rays, a filter (90) for preferentially transmitting the characteristic x-rays but blocking the Bremsstrahlung photons, a movable element (Figure 18, and Column 9, lines 5-16) for focusing or collimating the transmitted characteristic x-rays into a beam and means for controlling (304) the position of the movable element. Weiser teaches a “micro-miniature” apparatus, since no language in the claim, nor specific, limiting, definition in the specification, precludes an apparatus of Weiser’s size, nor precludes an apparatus that can operate in “micro” ranges (Column 10, lines 8 and 20-23).

Allowable Subject Matter

4. Claims 1-12 are allowed.
5. Claims 1-12 remain allowable for at least the reasons set forth in the Office action dated 04/08/05.

Response to Arguments

6. Applicant's arguments with respect to claim 13 have been considered but are moot in view of the new ground(s) of rejection.

7. Additionally, Applicant's arguments filed 08/05/05 have been fully considered but they are not persuasive with respect to the limitation "micro-miniature". As set forth above, there is no limiting, specific definition of the term so as to preclude other devices. The term amounts to relative terminology, since no particular size has been clearly given to the term.
